

SARA ROSATI

Junior Full Stack Developer | Python, Django, Flask, JavaScript

Bassersdorf / Zürich, Switzerland | +41 76 275 58 87 | rosati.sara@protonmail.com
rosatisara.com | github.com/Saretta1194 | linkedin.com/in/sararosati | Swiss C Permit

PROFESSIONAL PROFILE

Junior Full Stack Developer with a Code Institute Full Stack Software Development Diploma (completed February 2026) and hands-on experience building and deploying web applications. Works with Python, Django, Flask, JavaScript and relational databases; projects cover authentication, role-based workflows, backend logic and deployment. Brings reliability, teamwork and calm problem-solving from several years in Swiss hospitality. Seeking a junior software or web development role.

KEY SKILLS

Development: Python, Django, Flask, JavaScript ES6+, HTML5, CSS3, PostgreSQL, SQLite, REST APIs

Additional exposure: React, TypeScript, Bootstrap, Node.js, Express.js, FastAPI basics

Tools: Git, GitHub, VS Code, Postman, Chrome DevTools, Heroku, Cloudinary, GitHub Pages

Practices: Debugging, responsive design, version control, Agile/Scrum familiarity, testing fundamentals

SELECTED TECHNICAL PROJECTS

FoodHUB | Full-Stack Food Delivery Platform

Django, PostgreSQL, Cloudinary, Heroku | 2025-2026

- Built and deployed a multi-role platform for customers, restaurant owners and administrators, including authentication, authorization, order management and cloud-based image storage.
- Designed data models, backend business logic and deployment workflow end to end.

foodhub-f53dab9dc3ee.herokuapp.com | github.com/Saretta1194/FoodHUB

Heritage Housing | Real Estate Data Explorer

Flask, SQLite, JavaScript, Bootstrap | 2025

- Developed an interactive housing data explorer with advanced filtering and backend queries through Flask endpoints.
- Deployed the application on Heroku with an integrated SQLite database.

heritage-housing-price-7ed9ab08529f.herokuapp.com | github.com/Saretta1194/Heritage-housing

BrainSync | Brain Training Platform

Flask, PostgreSQL, JavaScript | 2025

- Created memory and logic games with user data handling, score tracking and game-state management.
- Implemented Flask endpoints and deployed the application with PostgreSQL on Heroku.

brainsync-0f71c4bb1b9c.herokuapp.com | github.com/Saretta1194/BrainSync

ADDITIONAL PROJECT

Dot Runner | Browser Arcade Game

JavaScript ES6, HTML5 Canvas | 2025

- Built an object-oriented browser game with collision detection and real-time Canvas rendering.
